

# CENTRAL SCREW PRODUCTS

MANUFACTURING MASTERY SINCE 1924

## CNC Machine Operator

At Central Screw Products we focus on innovation, precision, and manufacturing prowess. We experiment, problem solve, engineer, and automate. We maximize quality and efficiency, minimize costs, and find solutions. We roll up our sleeves and cut metal.

Do you have what it takes to be part of the CSP team?

We're looking for hands-on, creative, and intelligent people who are passionate about their work, love to be challenged, and strive to be extraordinary. CSP aims to provide our employees with stimulating and fulfilling work in an environment that nurtures the spirit of learning.

We currently have an opening for an experienced CNC Machine Operator. This is an excellent position with the opportunity for growth for an adept operator.

Daily work duties will be divided between projects and tasks related to:

- CNC Programming
- CNC machine cell and robot operation and change over's
- Production issue troubleshooting
- Ensuring quality parts, including checking and analyzing quality data results
- General shop duties as needed

### Desired Experience & Skills

- CNC Programming
- 5 Years CNC machining experience; multi-axis a plus
- Perform change over's; perform setups a plus
- Basic measuring tools
- An exceptional eye for quality and precision
- Strong general computer skills
- Excellent communication skills

Central Screw Products offers competitive pay, a great benefits package, and the potential for quarterly bonuses. Salary based on qualifications and experience. Must pass pre-employment drug test and background check.
